

YOUTH MENTAL HEALTH SCREENING

Are you 12 to 25 years old?

Are you experiencing recent changes in thinking, mood, and/or behavior such as having unusual thoughts or seeing or hearing things?

Are you puzzled by these changes and seeking explanations?

We are recruiting research participants for mental health prevention and treatment programs. We offer free evaluations to assess mental health symptoms to determine your eligibility to participate in current and future studies in our department. If eligible, participation in other studies is voluntary.

You will receive:

- A 2-hour clinical interview with a trained clinician
- A set of self-report questionnaires
- Clinical feedback from the clinician
- \$30 compensation for participating in the clinical interview

For more information, contact Colette Potts at
617.209.9169 talk/text or
ResponsetoRisk@bidmc.harvard.edu

All calls are confidential.
Calling to inquire about the study does not obligate
you to participate.

Principal Investigator: Michelle Friedman-Yakoobian, Ph.D.
